Volume Contents

Number 1 — January

SURVEY PAPER

G. O. Guardabassi and S. M. Savaresi 1 **Approximate linearization via feedback — an overview**

REGULAR PAPERS

E. Prempain and I. Postlethwaite 17 **Feedforward control: a full-information approach**

S. Jørgensen and G. Zaccour 29 **Incentive equilibrium strategies and welfare allocation in a dynamic game of pollution control**

BRIEF PAPERS

F. Z. Chaoui, F. Giri and M. M'Saad 37 **Asymptotic stabilization of linear plants in presence of input and output saturations**

K. Suyama 43 **Finite spectrum assignment for linear systems with non-commensurate time-delays**

S. Hu and J. Wang 51 **Quadratic stabilizability of a new class of linear systems with structural independent time-varying uncertainty**

A. Armaou and P. D. Christofides 61 **Robust control of parabolic PDE systems with time-dependent spatial domains**

P. Lucibello and G. Oriolo 71 **Robust stabilization via iterative state steering with an application to chained-form systems**

T. Knudsen 81 **Consistency analysis of subspace identification methods based on a linear regression approach**

V. Ionescu, S.-I. Niculescu, J.-M. Dion, L. Dugard and H. Li 91 **Generalized Popov theory applied to state-delayed systems**

B. David and G. Bastin 99 **An estimator of the inverse covariance matrix and its application to ML parameter estimation in dynamical systems**

J. N. Nielsen and H. Madsen 107 **Applying the EKF to stochastic differential equations with level effects**

Z. Ding 113 **Global output regulation of uncertain nonlinear systems with exogenous signals**

A. Piazzi and A. Visioli 121 **Optimal noncausal set-point regulation of scalar systems**

A. Ferrara and L. Giacomini 129 **On modular backstepping design with second order sliding modes**

K. Fujimoto and T. Sugie 137 **Freedom in coordinate transformation for exact linearization and its application to transient behavior improvement**

TECHNICAL COMMUNIQUES

Z. Pan 145 **Differential geometric condition for feedback complete linearization of stochastic nonlinear system**

D. Angeli, A. Casavola and E. Mosca 151 **On feasible set-membership state estimators in constrained command governor control**

CORRESPONDENCE

Z. Gajic and M. Lelic 157 Comments on the review of the book Modern Control System Engineering

BOOK REVIEWS

J. Lunze 159 Discrete-event system theory — an introduction by A. Tornambè

L. Yu and M. Yang 160 Robust control system design, advanced state space techniques by C.-C. Tsui

Number 2 — February

EDITORIAL

H. Kwakernaak 163 Reviewers' commendations

REGULAR PAPERS

G. Tao, X. Ma and Y. Ling 165 Optimal and nonlinear decoupling control of systems with sandwiched backlash

E. Bølviken, P. J. Acklam, N. Christophersen and J.-M. Størdal 177 Monte Carlo filters for non-linear state estimation

I. Zaballa 185 Feedback invariants of restrictions — a polynomial approach

BRIEF PAPERS

F. Z. Chaoui, F. Giri and M. M'Saad 197 Adaptive control of input-constrained type-1 plants stabilization and tracking

C. Du, L. Xie and C. Zhang 205 H_∞ control and robust stabilization of two-dimensional systems in Roesser models

D. Filipović and D. Schröder 213 Control of vibrations in multi-mass systems with locally controlled absorbers

F. Wu and K. M. Grigoriadis 221 LPV Systems with parameter-varying time delays: analysis and control

B. Del-Muro-Cuéllar and M. Malabre 231 Fixed poles of disturbance rejection by dynamic measurement feedback: a geometric approach

B. Chen and J. K. Tugnait 239 Tracking of multiple maneuvering targets in clutter using IMM/JPDA filtering and fixed-lag smoothing

D. Dimogianopoulos and R. Lozano 251 Adaptive control for linear slowly time-varying systems using direct least-squares estimation

P. V. Zhivoglyadov, R. H. Middleton and M. Fu 257 Further results on localization-based switching adaptive control

M. Arcak, A. Teel and P. Kokotović 265 Robust nonlinear control of feedforward systems with unmodeled dynamics

B. L. Cooley and J. H. Lee 273 Control-relevant experiment design for multivariable systems described by expansions in orthonormal bases

M. Sun and D. Wang 283 Sampled-data iterative learning control for nonlinear systems with arbitrary relative degree

TECHNICAL COMMUNIQUES

C. Hwang and S.-F. Yang 291 The use of Routh array for testing the Hurwitz property of a segment of polynomials

J.-F. Camart, M. Malabre and J.-C. Martinez-Garcia 297 Fixed poles of simultaneous disturbance rejection and decoupling: a geometric approach

A. V. Savkin and A. S. Matveev 303 A switched server system of order n with all its trajectories converging to (n1)! limit cycles

Y. S. Moon, P. Park and W. H. Kwon 307 Robust stabilization of uncertain input-delayed systems using reduction method

W. Xing, Q. Zhang, J. Zhang and Q. Wang 313 **Some geometric properties of Lyapunov equation and LTI system**

BOOK REVIEWS

J. Smieja 317 **Advanced modern control system theory and design by S. M. Shinners**

B. Bona 319 **Fuzzy controllers by L. Reznik**

P. A. Iglesias 321 **Algorithms for linear quadratic optimization by V. Sima**

X. Chen 322 **Control of uncertain sampled-data systems by G. E. Dullerud**

Number 3 — March

REGULAR PAPERS

T. T. Ho, P. W. Fieguth and A. S. Willsky 325 **Computationally efficient steady-state multiscale estimation for 1-D diffusion processes**

H. S. Hoang, R. Baraille and O. Talagrand 341 **On the design of a stable adaptive filter for state estimation in high dimensional systems**

C. W. Scherer 361 **LPV control and full block multipliers**

Q.-G. Wang and Y. Zhang 377 **Robust identification of continuous systems with dead-time from step responses**

D. Gorinevsky and G. Vukovich 391 **Model-based update in task-level feedforward control using on-line approximation**

BRIEF PAPERS

E. K. Boukas and Z. K. Liu 401 **Manufacturing systems with random breakdowns and deteriorating items**

E. Gershon, U. Shaked and I. Yaesh 409 **H_∞ control and filtering of discrete-time stochastic systems with multiplicative noise**

C. Ham, Z. Qu and J. Kaloust 419 **Nonlinear learning control for a class of nonlinear systems**

L. Magni, H. Nijmeijer and A. J. van der Schaft 429 **A receding–horizon approach to the nonlinear H_∞ control problem**

T. Hamel and D. Meizel 437 **On robustness and precision of mobile robots missions**

N. Biehn, S. L. Campbell, R. Nikoukhah and F. Delebecque 445 **Numerically constructible observers for linear time-varying descriptor systems**

E. Panteley and A. Loria 453 **Growth rate conditions for uniform asymptotic stability of cascaded time-varying systems**

D. Henrion, D. Arzelier, D. Peaucelle and M. Šebek 461 **An LMI condition for robust stability of polynomial matrix polytopes**

I. D. Landau, B. D. O. Anderson and F. De Bruyne 469 **Recursive identification algorithms for continuous-time nonlinear plants operating in closed loop**

TECHNICAL COMMUNIQUE

Z. G. Li, C. Y. Wen and Y. C. Soh 477 **Switched controllers and their applications in bilinear systems**

CORRESPONDENCE

D. Q. Mayne and J. B. Rawlings 483 **Correction to "Constrained model predictive control: stability and optimality"**

ERRATUM

M.-G. Yoon 485 **Erratum to "A comment on L_∞ optimal control of SISO continuous-time systems" [*Automatica* 36 (2000) 1923]**

Number 4 — April

SURVEY PAPER

M. van de Wal and B. de Jager 487 **A review of methods for input/output selection**

REGULAR PAPER

M. Mossberg, L. Hillström and T. Söderström 511 **Non-parametric identification of viscoelastic materials from wave propagation experiments**

BRIEF PAPERS

J. Blot and N. Hayek 523 **Conjugate points in infinite-horizon control problems**

E. Mosca and T. Agnoloni 527 **Inference of candidate loop performance and data filtering for switching supervisory control**

C. Bonivento, L. Marconi and R. Zanasi 535 **Output regulation of nonlinear systems by sliding mode**

E. Fridman 543 **A descriptor system approach to nonlinear singularly perturbed optimal control problem**

Y. Zhang, C. Wen and Y. C. Soh 551 **Robust adaptive control of nonlinear discrete-time systems by backstepping without overparameterization**

H. Akçay 559 **Synthesis of complete rational orthonormal bases with prescribed asymptotic order**

G. Zhai, M. Ikeda and Y. Fujisaki 565 **Decentralized H_∞ controller design: a matrix inequality approach using a homotopy method**

G. Calafiore and L. El Ghaoui 573 **Robust maximum likelihood estimation in the linear model**

M. Akar and M. E. Sezer 581 **Associative memory design using overlapping decompositions**

A. Bonchis, P. I. Corke, D.C. Rye and Q. P. Ha 589 **Variable structure methods in hydraulic servo systems control**

D. Henrion, S. Tarbouriech and V. Kučera 597 **Control of linear systems subject to input constraints: a polynomial approach**

TECHNICAL COMMUNIQUES

S. T. Impram and N. Munro 605 **A note on absolute stability of uncertain systems**

S. N. Huang, K. K. Tan and T. H. Lee 611 **A combined PID/adaptive controller for a class of nonlinear systems**

A. Czornik and A. Swierniak 619 **Lower bounds on the solution of coupled algebraic Riccati equation**

C. Mosquera and F. Pérez 625 **On the strengthened robust SPR problem for discrete-time systems**

BOOK REVIEWS

J. Shinar 629 **Performance, stability, dynamics and control of airplanes by B. N. Pamadi**

S. P. Banks 630 **An introduction to infinite-dimensional linear systems theory by R. F. Curtain and H. Zwart**

A. L. Stevens 632 **Quantitative feedback theory: fundamentals and applications by C. H. Houpis and S. J. Rasmussen**

B. M. Chen 634 **Robust stabilization and H_∞ problems by V. Ionescu and A. Stoica**

Number 5 — May

SURVEY PAPER

P. Kokotović and M. Arcak 637 **Constructive nonlinear control: a historical perspective**

REGULAR PAPERS

H. Akçay and P. Heuberger 663 **A frequency-domain iterative identification algorithm using general orthonormal basis functions**

A. Stenman and F. Gustafsson	675	**Adaptive smoothing methods for frequency-function estimation**
M. Staroswiecki and G. Comtet-Varga	687	**Analytical redundancy relations for fault detection and isolation in algebraic dynamic systems**
T. I. Fossen and J. P. Strand	701	**Nonlinear passive weather optimal positioning control (WOPC) system for ships and rigs: experimental results**
		BRIEF PAPERS
G.-H. Yang, J. L. Wang and Y. C. Soh	717	**Reliable H_∞ controller design for linear systems**
G.-H. Yang and J. L. Wang	727	**Non-fragile H_∞ control for linear systems with multiplicative controller gain variations**
F. J. D'Amato, M. A. Rotea, A. V. Megretski and U. T. Jönsson	739	**New results for analysis of systems with repeated nonlinearities**
F. Giri, F. Z. Chaoui and Y. Rochdi	749	**Parameter identification of a class of Hammerstein plants**
C. Mosquera and F. Pérez	757	**Algebraic solution to the robust SPR problem for two polynomials**
		TECHNICAL COMMUNIQUES
R. J. Mantz, H. De Battista and P. Puleston	763	**A new approach to reaching mode of VSS using trajectory planning**
S. Xu, C. Yang, Y. Niu and J. Lam	769	**Robust stabilization for uncertain discrete singular systems**
K.-K. Shyu, Y.-W. Tsai and C.-K. Lai	775	**A dynamic output feedback controllers for mismatched uncertain variable structure systems**
M. Gevers, L. Ljung and P. Van den Hof	781	**Asymptotic variance expressions for closed-loop identification**
		BOOK REVIEWS
I. Bucher	787	**Mechatronics, 2nd Edition by W. Bolton**
J. S. Gierke	790	**Optimal control of soil venting: mathematical modeling and applications by H. H. Gerke, U. Hornung, Y. Kelanemer, M. Slodička and S. Schumacher**
A. Ilchmann	792	**Stabilization of linear systems by V. Drăgan and A. Halanay**
J. Böhm	793	**Robust adaptive control by P. A. Ioannou and J. Sun**
P. Voulgaris	795	**Computational methods for controller design by N. Elia and M. A. Dahleh**
M. Karpel	797	**Robust aeroservoelastic stability analysis by R. Lind and M. Brenner**
B. De Schutter	799	**Stability analysis of discrete event systems by K. M. Passino and K. L. Burgess**

Number 6 — June

		EDITORIAL
P. Albertos and P. Van den Hof	803	**Obituary of Pieter Eykhoff, 1929–2000**
		REGULAR PAPERS
K. Ezal, P. V. Kokotović, A. R. Teel and T. Başar	805	**Disturbance attenuating output-feedback control of nonlinear systems with local optimality**
Y. Hong	819	**H_∞ control, stabilization, and input–output stability of nonlinear systems with homogeneous properties**
B. Hamzi and L. Praly	831	**Ignored input dynamics and a new characterization of control Lyapunov functions**
H. Ito and R. A. Freeman	843	**State-dependent scaling design for a unified approach to robust back-stepping**

Z.-P Jiang and Y. Wang	857	Input-to-state stability for discrete-time nonlinear systems
		BRIEF PAPERS
V. Ramakrishna, L.R. Hunt and G. Meyer	871	Parameter variations, relative degree, and stable inversion
M. Arif, T. Ishihara and H. Inooka	881	Incorporation of experience in iterative learning controllers using locally weighted learning
M. H. Khammash and L. Zou	889	Analysis of steady-state tracking errors in sampled-data systems with uncertainty
B.-S. Ko and T. F. Edgar	899	Performance assessment of multivariable feedback control systems
P. Kosmol and M. Pavon	907	Solving optimal control problems by means of general Lagrange functionals
S. Hanba and Y. Miyasato	915	Output feedback stabilization of bilinear systems using dead-beat observers
C. Belta, G. Gu, A. Sparks and S. Banda	921	Rotating stall control for axial flow compressors
J. A. Primbs	933	The analysis of optimization based controllers
J. Schoukens, R. Pintelon, Y. Rolain and T. Dobrowiecki	939	Frequency response function measurements in the presence of nonlinear distortions
H. Wong, M. S. de Queiroz and V. Kapila	947	Adaptive tracking control using synthesized velocity from attitude measurements
		CORRESPONDENCE
Z. Ruijun, P. Xuejun and H. Weili	955	Comments on "Robust stabilization of MIMO nonlinear time-varying mismatched uncertain systems"
		BOOK REVIEWS
Y. Bar-Shalom	957	Kalman filtering techniques for radar tracking by K. V. Ramachandra
B. K. Bose	958	Fuzzy control of industrial systems—theory and applications by I. S. Shaw
N. Cowan	960	Mechanics and control of robots by K. C. Gupta
S. P. Bhattacharyya	961	The art of control engineering by K. Dutton, S. Thompson and B. Barraclough
A. Karniel	964	Control of movement for the physically disabled by D. Popović and T. Sinkjaer

Number 7 — July

		REGULAR PAPERS
P. Chen, H. Qin and J. Huang	969	Local stabilization of a class of nonlinear systems by dynamic output feedback
P. R. Pagilla and M. Tomizuka	983	An adaptive output feedback controller for robot arms: stability and experiments
J.-X. Xu and W.-J. Cao	997	Learning variable structure control approaches for repeatable tracking control tasks
K. Najim, A. S. Poznyak and E. Gomez	1007	Adaptive policy for two finite Markov chains zero-sum stochastic game with unknown transition matrices and average payoffs
L. Chisci, J. A. Rossiter and G. Zappa	1019	Systems with persistent disturbances: predictive control with restricted constraints
L. Xu and B. Yao	1029	Output feedback adaptive robust precision motion control of linear motors
		BRIEF PAPERS
D. A. Lawrence	1041	Analysis and design of gain scheduled sampled-data control systems
B. De Schutter and T. van den Boom	1049	Model predictive control for max-plus-linear discrete event systems
M. Egerstedt and C. F. Martin	1057	Optimal trajectory planning and smoothing splines

H. Y. Zhang, C. W Chan, K. C. Cheung and Y. J. Ye 1065 **Fuzzy artmap neural network and its application to fault diagnosis of navigation systems**

M. Valečková, M. Kárný and E. L. Sutanto 1071 **Bayesian M-T clustering for reduced parameterisation of Markov chains used for non-linear adaptive elements**

U. Soverini and S. Beghelli 1079 **Identification of static errors-in-variables models: the rank reducibility problem**

W. P. M. H. Heemels, B. De Schutter and A. Bemporad 1085 **Equivalence of hybrid dynamical models**

W. Lin and C. Qian 1093 **Semi-global robust stabilization of MIMO nonlinear systems by partial state and dynamic output feedback**

D. Angeli 1103 **Almost global stabilization of the inverted pendulum via continuous state feedback**

M. Alamir 1109 **Solutions of nonlinear optimal and robust control problems via a mixed collocation/DAE's based algorithm**

A. Zavala-Rio and B. Brogliato 1117 **Direct adaptive control design for one-degree-of-freedom complementary-slackness jugglers**

Z.-J. Yang and M. Tateishi 1125 **Adaptive robust nonlinear control of a magnetic levitation system**

TECHNICAL COMMUNIQUES

M. Bodson 1133 **Performance of an adaptive algorithm for sinusoidal disturbance rejection in high noise**

J. Gao, B. Huang and Z. Wang 1141 **LMI-based robust H^- control of uncertain linear jump systems with time-delays**

Number 8 — August

EDITORIAL

K. S. Narendra and F. L. Lewis 1147 **Introduction to the special issue on neural network feedback control**

SPECIAL ISSUE PAPERS

J. Q. Gong and B. Yao 1149 **Neural network adaptive robust control of nonlinear systems in semi-strict feedback form**

Y. Zhang and J. Wang 1161 **Recurrent neural networks for nonlinear output regulation**

G. Arslan and T. Başar 1175 **Disturbance attenuating controller design for strict-feedback systems with structurally unknown dynamics**

J. Wang and J. Huang 1189 **Neural network enhanced output regulation in nonlinear systems**

A. J. Calise, N. Hovakimyan and M. Idan 1201 **Adaptive output feedback control of nonlinear systems using neural networks**

G. A. Rovithakis 1213 **Stable adaptive neuro-control design via Lyapunov function derivative estimation**

R. Padhi, S. N. Balakrishnan and T. Randolph 1223 **Adaptive-critic based optimal neuro control synthesis for distributed parameter systems**

L.-X. Wang and F. Wan 1235 **Structured neural networks for constrained model predictive control**

L. Chen and K. S. Narendra 1245 **Nonlinear adaptive control using neural networks and multiple models**

A. S. Poznyak and L. Ljung 1257 **On-line identification and adaptive trajectory tracking for nonlinear stochastic continuous time systems using differential neural networks**

R. R. Selmic and F. L. Lewis 1269 **Neural net backlash compensation with Hebbian tuning using dynamic inversion**

T. Parisini and S. Sacone 1279 **Stable hybrid control based on discrete-event automata and receding-horizon neural regulators**

Y. Li, N. Sundararajan and P. Saratchandran 1293 **Neuro-controller design for nonlinear fighter aircraft maneuver using fully tuned RBF networks**

Number 9 — September

EDITORIAL

H. Kwakernaak 1303 **New Automatica submission and review system PAMPUS**

REGULAR PAPERS

B. Yao and M. Tomizuka 1305 **Adaptive robust control of MIMO nonlinear systems in semi-strict feedback forms**

J. Hu, K. Hirasawa and K. Kumamaru 1323 **A homotopy approach to improving PEM identification of ARMAX models**

L. Hou and A. N. Michel 1335 **Stability analysis of pulse-width-modulated feedback systems**

L. Magni, G. De Nicolao, L. Magnani and R. Scattolini 1351 **A stabilizing model-based predictive control algorithm for nonlinear systems**

BRIEF PAPERS

T. Hagiwara, M. Suyama and M. Araki 1363 **Upper and lower bounds of the frequency response gain of sampled-data systems**

G. Bartolini, A. Pisano and E. Usai 1371 **Digital second-order sliding mode control for uncertain nonlinear systems**

S. D. Patek 1379 **On terminating Markov decision processes with a risk-averse objective function**

M. Bisiacco and M. E. Valcher 1387 **Behavior decompositions and two-sided diophantine equations**

M. Vidyasagar and V. D. Blondel 1397 **Probabilistic solutions to some NP-hard matrix problems**

E. F. Mulder, M. V. Kothare and M. Morari 1407 **Multivariable anti-windup controller synthesis using linear matrix inequalities**

E. Frisk and M. Nyberg 1417 **A minimal polynomial basis solution to residual generation for fault diagnosis in linear systems**

Y. Jia and J. Ackermann 1425 **Condition and algorithm for simultaneous stabilization of linear plants**

X. Liu and G. Huang 1435 **Global decentralized robust stabilization for interconnected uncertain nonlinear systems with multiple inputs**

F. A. Cuzzola and A. Ferrante 1443 **Explicit formulas for LMI-based H_2 filtering and deconvolution**

B. Cottenceau, L. Hardouin, J.-L. Boimond and J.-L. Ferrier 1451 **Model reference control for timed event graphs in dioids**

TECHNICAL COMMUNIQUES

F. Amato, M. Ariola and P. Dorato 1459 **Finite-time control of linear systems subject to parametric uncertainties and disturbances**

T. S. Brinsmead and G. C. Goodwin 1465 **Cheap decoupled control**

D. Vrančić, S. Strmčnik and Đ. Juričić 1473 **A magnitude optimum multiple integration tuning method for filtered PID controller**

A. Loria, E. Panteley and H. Nijmeijer 1481 **A remark on passivity-based and discontinuous control of uncertain nonlinear systems**

Y. Zhu, Z. You, J. Zhao, K. Zhang and X. R. Li 1489 **The optimality for the distributed Kalman filtering fusion with feedback**

S. M. Shahruz and L. G. Krishna 1495 **Boundedness of voltages and currents in Josephson junctions represented by the perturbed sine-Gordon equation**

BOOK REVIEWS

J. R. Perkins 1499 **Optimal flow control in manufacturing systems: production planning and scheduling by O. Maimon, E. Khmelnitsky and K. Kogan**

G. Vachtsevanos 1500 **Large-scale systems: modeling, control, and fuzzy logic by M. Jamshidi**

A. A. Stoorvogel 1502 **Control of indefinite nonlinear dynamic systems: induced internal feedback by S.V. Emel'yanov, I.A. Burovoi and F.Yu. Levada**

Number 10 — October

REGULAR PAPERS

J. A. Filar and A. Haurie 1505 **A two-factor stochastic production model with two time scales**

M. Vidyasagar 1515 **Randomized algorithms for robust controller synthesis using statistical learning theory**

W. P. Heath 1529 **Bias of indirect non-parametric transfer function estimates for plants in closed loop**

P. A. Iglesias 1541 **Tradeoffs in linear time-varying systems: an analogue of Bode's sensitivity integral**

F. Xue, L. Guo and M. Y. Huang 1551 **Towards understanding the capability of adaptation for time-varying systems**

D. Bauer 1561 **Order estimation for subspace methods**

M. Ghandhari, G. Andersson, M. Pavella and D. Ernst 1575 **A control strategy for controllable series capacitor in electric power systems**

BRIEF PAPERS

V. Fromion, S. Monaco and D. Normand-Cyrot 1585 **The weighted incremental norm approach: from linear to nonlinear H_∞ control**

M. Gilson and P. Van den Hof 1593 **On the relation between a bias-eliminated least-squares (BELS) and an IV estimator in closed-loop identification**

L. Magni, G. De Nicolao and R. Scattolini 1601 **Output feedback and tracking of nonlinear systems with model predictive control**

R. Orsi, L. Praly and I. Mareels 1609 **Sufficient conditions for the existence of an unbounded solution**

C. V. Rao, J. B. Rawlings and J. H. Lee 1619 **Constrained linear state estimation—a moving horizon approach**

X. Bombois, M. Gevers, G. Scorletti and B. D. O. Anderson 1629 **Robustness analysis tools for an uncertainty set obtained by prediction error identification**

A. K. Tangirala, D. Li, R. S. Patwardhan, S. L. Shah and T. Chen 1637 **Ripple-free conditions for lifted multirate control systems**

V. O. Nikiforov 1647 **Nonlinear servocompensation of unknown external disturbances**

D. W. C. Ho and Z. Gao 1655 **Bezout identity related to reduced-order observer-based controllers for singular systems**

H. Ito 1663 **New characterization and solution of input-to-state stabilization: a state-dependent scaling approach**

C. W. Chan, H. Jin, K. C. Cheung and H. Y. Zhang 1671 **Fault detection of systems with redundant sensors using constrained Kohonen networks**

CORRESPONDENCE

S. K. Nguang 1677 **Comments on "Robust stabilization of uncertain input-delay systems by sliding mode control with delay compensation"**

BOOK REVIEWS

D. R. Lewin 1679 **Nonlinear model-based process control—applications in petroleum refining by R. M. Ansari and M. O. Tadé**

M. de Oliveira and M. Jamshidi 1681 Modeling and control of robot manipulators by L. Sciavicco and B. Siciliano

C.-H. Chen and E. Yücesan 1682 Introduction to discrete event systems by C. G. Cassandras and S. Lafortune

P. Ioannou 1685 Adaptive control of systems with actuator and sensor nonlinearities by G. Tao and P. V. Kokotović

Number 11 — November

REGULAR PAPERS

I. D. Landau, A. Karimi and A. Constantinescu 1689 Direct controller order reduction by identification in closed loop

M. Šimandl, J. Královec and P. Tichavský 1703 Filtering, predictive, and smoothing Cramér–Rao bounds for discrete-time nonlinear dynamic systems

A. R. Woodyatt, J. S. Freudenberg and R. H. Middleton 1717 An integral constraint for single input two output feedback systems

J. W. Howse, L. O. Ticknor and K. R. Muske 1727 Least squares estimation techniques for position tracking of radioactive sources

A. A. Alonso and B. E. Ydstie 1739 Stabilization of distributed systems using irreversible thermodynamics

P. D. Roberts and V. M. Becerra 1757 Optimal control of a class of discrete–continuous non-linear systems—decomposition and hierarchical structure

BRIEF PAPERS

Ü. Kotta, A. S. I. Zinober and P. Liu 1771 Transfer equivalence and realization of nonlinear higher order input–output difference equations

D. J. Clements and H. K. Wimmer 1779 Monotonicity of the optimal cost in the discrete-time regulator problem and Schur complements

D. W. Berns, J. L. Moiola and G. Chen 1787 Detecting period-doubling bifurcation: an approximate monodromy matrix approach

C.-F. Yung and H.-S. Wang 1797 H' controller reduction for nonlinear systems

K. Hamamoto and T. Sugie 1803 An iterative learning control algorithm within prescribed input–output subspace

A. S. Bazanella and R. Reginatto 1811 Robust tuning of the speed loop in indirect field oriented control of induction motors

S. S. Ge, Z. Sun and T. H. Lee 1819 Nonregular feedback linearization for a class of second-order nonlinear systems

M. Moallem, R. V. Patel and K. Khorasani 1825 Nonlinear tip-position tracking control of a flexible-link manipulator: theory and experiments

J. Vada, O. Slupphaug, T. A. Johansen and B. A. Foss 1835 Linear MPC with optimal prioritized infeasibility handling: application, computational issues and stability

M. W. Spong, P. Corke and R. Lozano 1845 Nonlinear control of the Reaction Wheel Pendulum

H. Akçay 1853 A generalization of a standard inequality for Hardy space H_1

TECHNICAL COMMUNIQUES

Z. Gajic and M. Lelic 1859 Improvement of system order reduction via balancing using the method of singular perturbations

C.-J. Wang and H.-E. Liao 1867 Impulse observability and impulse controllability of linear time-varying singular systems

J. Wei and S. Wenzhong 1873 Controllability of singular systems with control delay

BOOK REVIEW

N.A. Kheir 1879 Control system design by G. C. Goodwin, S. F. Graebe and M. E. Salgado

Number 12 — December

REGULAR PAPERS

R. Banning, W. L. de Koning, H. J. M. T. A. Adriaens and R. K. Koops — 1883 — State-space analysis and identification for a class of hysteretic systems

K. Fujimoto, B. D. O. Anderson and F. De Bruyne — 1893 — A parametrization for closed-loop identification of nonlinear systems based on differentially coprime kernel representations

S. Lall and G. Dullerud — 1909 — An LMI solution to the robust synthesis problem for multi-rate sampled-data systems

M. Arcak and P. Kokotović — 1923 — Nonlinear observers: a circle criterion design and robustness analysis

Z.-G. Hou — 1931 — A hierarchical optimization neural network for large-scale dynamic systems

J. Zhao and M. W. Spong — 1941 — Hybrid control for global stabilization of the cart–pendulum system

V. O. Nikiforov and K. V. Voronov — 1953 — Adaptive backstepping with a high-order tuner

BRIEF PAPERS

A. Astolfi and P. Colaneri — 1961 — Trading robustness with optimality in nonlinear control

J. Yu, A. Jadbabaie, J. Primbs and Y. Huang — 1971 — Comparison of nonlinear control design techniques on a model of the Caltech ducted fan

M. Mattei — 1979 — An LMI approach to the design of a robust observer with application to a temperature control problem for space vehicle testing

A. N. Gündeş and M. G. Kabuli — 1989 — Simultaneously stabilizing controller design for a class of MIMO systems

M. Mattei — 1997 — Robust multivariable PID control for linear parameter varying systems

T. Gustafsson — 2005 — Subspace identification using instrumental variable techniques

S. Gunnarsson and M. Norrlöf — 2011 — On the design of ILC algorithms using optimization

H. W. J. Lee, K. L. Teo and A. E. B. Lim — 2017 — Sensor scheduling in continuous time

G. J. Silva, A. Datta and S. P. Bhattacharyya — 2025 — PI stabilization of first-order systems with time delay

D. M. Bošković and M. Krstić — 2033 — Nonlinear stabilization of a thermal convection loop by state feedback

Q.-G. Wang, C. C. Hang and X.-P. Yang — 2041 — Single-loop controller design via IMC principles

G. Marchetti, C. Scali and D. R. Lewin — 2049 — Identification and control of open-loop unstable processes by relay methods

P. Lemmerling and B. De Moor — 2057 — Misfit versus latency

TECHNICAL COMMUNIQUES

R. Wallin, A. J. Isaksson and O. Norėus — 2069 — Extensions to "Output prediction under scarce data operation: control applications"

S. T. Glad and A. J. Isaksson — 2073 — Bounds on the response time under control constraints

BOOK REVIEWS

N. H. McClamroch — 2077 — Space vehicle dynamics and control by B. Wie

A. Bacciotti — 2079 — Nonlinear control systems — an algebraic setting by G. Conte, C. H. Moog and A. M. Perdon

2081 — List of reviewers for *Automatica* 2001
